

*The future will bring technological revolutions and political upheaval, but some things are timeless. Love grows, trust is precious, and no plan ever survives contact with the enemy.*

Naomi Kwan is running for her life. First she's accused of terrorism, then her friend Serena is charged with murder, and then the police try to kill them both. They escape with their lives before the corrupt officials behind the frame-ups can silence them, but as conspiracies unravel on all sides, their luck is sure to run out.

Carl Jenson and his brother Parker are government contractors hired to gather evidence against Naomi, but the mission turns personal when all hell breaks loose. They know Naomi is innocent, and they know all about liberating people trapped by escalating violence. The hardest part will be convincing Naomi they're on her side.

A daring escape and a desperate rescue are only the beginning. Mysteries from Naomi's past will collide with Carl and Parker's many secrets, and unraveling the plots that tie them all together leads to explosive consequences.

*It's a simple plan: first get away, then fight for justice.*
